

**THE VERSATILE, DECELLULARIZED
DERMAL ALLOGRAFT UTILIZED IN
MULTIPLE TYPES OF PROCEDURES**

DERMA **[PURE]**
dCELL[®] technology

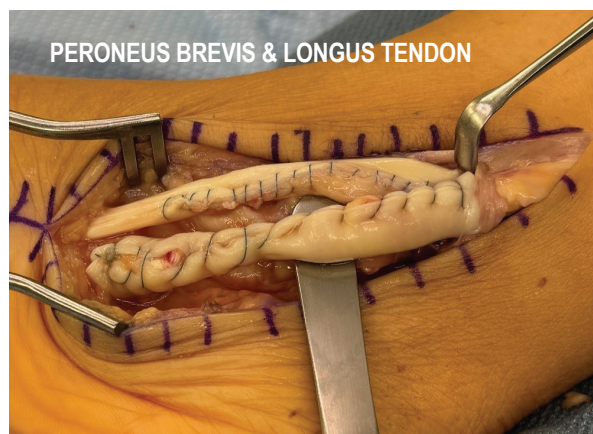

When implanted, DermaPure[®] is intended to provide soft tissue with supplemental support, reinforcement, and/or protection from mechanical stress.

DermaPure[®] with patented dCELL[®] Technology

Implantation of DermaPure provides the primary tendon repair with supplemental support, reinforcement, and/or protection from mechanical stress.

DermaPure placed as an onlay, provides this repair with supplemental support, reinforcement, and protection from mechanical stress.

DermaPure placed circumferentially provides this repair with supplemental support, reinforcement, and protection from mechanical stress.
