

Now Available!

Introducing AmnioPure, a placental allograft:

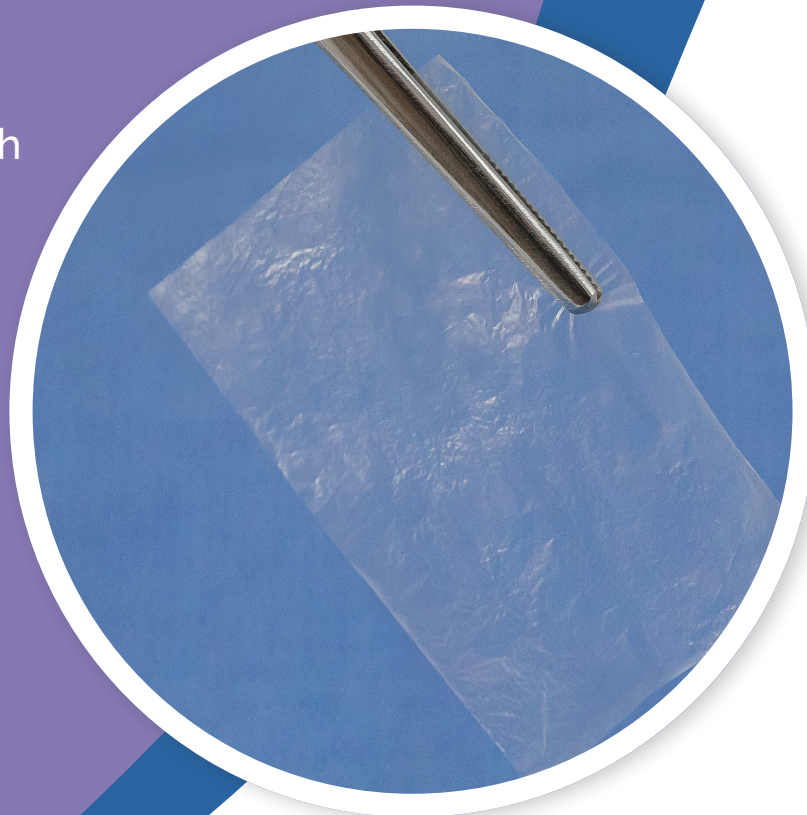

- Derived from human amniotic membrane
- Has an intact extracellular matrix
- Serves as a protective barrier

Unlike heat dehydration, which can damage tissue, AmnioPure is gently dried under controlled ambient conditions to preserve the integrity of the amnion graft.

Ease of Use

- May be re-hydrated
- Room temperature storage with a 5-year shelf life
- Sterilized to achieve Sterility Assurance Level (SAL) 10^{-6}
