

DermaPure just got larger!

**Now available in
16 cm X 20 cm**

Provides coverage for larger, more
complex surgical procedures.

More Coverage. Same Confidence.

New Size, Same Excellence.

- Same innovative decellularization process - dCELL® Technology.
- Decellularized dermal allograft with an intact extracellular matrix.
- Expanded surface area for broader applications.

Intended Use:

Provides a cover or barrier to the area needing replacement of integumental tissue. When implanted provides soft tissue with supplemental support, reinforcement, and/or protection against mechanical stress.

The larger size and intended use make DermaPure ideal for complex reconstructions and larger defects.
